Shine

is one of Estetica Vibrazionale's cosmetics based on **super coherent water**¹ and top quality active elements.

Action

The application of this product, during weight loss or sports programs, allows for greater reactivity of the adipose tissue.

Shine It is effective to even out the aromaticity of the skin and reduce all the stains caused by a hyper or melanin production type. It can be used in all parts of the body both in large and small areas. The consequence of a restoration of the correct activity of the melanocyte and the inclusion of hyaluronic acid in the formula increases skin hydration obtaining a secret effect on the skin.

Active Elements

Water: it is the leading element in EV's cosmetics. The super coherence of its structure allows to greatly increase the Vibrational Cosmetic's energetic and functional power, assuring the best results. Being so specifically treated, this Water also enhances the effects of the active elements it carries.

Arctostaphylos uva ursi leaf Extract better known as arbutin, it is a derivative of hydroquinone, a natural active substance present in the leaves of the grape urisin (bearberry) or Arctostaphylos uva ursi. Very common in Japan and in the rest of the air, this plant is used to "whiten" the skin from the marks left by sunstroke, as well as to regulate melanogenesis.

Western Rumex Extract native plant of Northern Canada, reduces skin pigmentation by limiting melanin production and skin redness. Clinical studies show that it significantly reduces the appearance of age spots.

¹Quantum electrodynamics (QED) brings forward a very interesting prospect. Water in living creatures, when in contact with biological matter, gets structured in an organized and coherent way. The greater is the coherence of the structure the best is the energy processing in cellular structures. Super coherence is the exaltation of this oxygen conveyance, which, so organized, allows to elaborate a better cells energetic quality.

Hyaluronic acid is the dry extract that has lipolytic properties, attributable to the presence of Forskolin which is an activator of the animated enzyme Cyclades. In addition to stimulating lipolysis, it also favors blood microcirculation, so it is useful for localized fat treatments.

How to use

Nebulize Shine directly on the interested skin areas (face and hands) twice a day. In case of deep affections it may be helpful to intensify applications. Effects are visible since the very first few applications. Regular and rhythmic use reinforces the results achieved and prevents skin congesting processes. Shine can be used on its own or, once properly absorbed, as a base for creams, serums or make-up of which it will boost active properties actions, improving the performance.
